

The Next Chapter in the Data Center Infrastructure Management Solution Story

A Next-Gen DCIM Solution Cloud-Native platform designed to take advantage of cloud technologies and infrastructure.

Security In and Out

Encryption on data at rest and in transit, two-factor authentication and access control to offer peace of mind.

Flexibility at the Core

Closely aligns with SmartZone PDU and UPS as well as vendor agnostic support for IT and facility devices.

Automatic Updates

Patches and updates installed automatically simplify the update process.

Limit Downtime

Instant alarms and connectivity dependencies to reduce downtime and allow for quicker issue resolution.

Lower Total Cost of Ownership

DCIM platform maintained by Panduit to reduce infrastructure costs and need for professional services.

Integration Ready

Multi-protocol support and fully documented REST API to enrich data analysis.

Simple and Effective

Visualizations in 2D and 3D along with user friendly dashboard and reports.

Power and Environmental Monitoring

Accurately displays used and available rack power capacity and historical environmental trends.
